## ΑΝΑΚΟΙΝΩΣΗ

## Προσφορά θέσης εργασίας στο ESRF - Γαλλία

Από το European Synchrotron Radiation Facility (ESRF), [Grenoble, France] λάβαμε το παρακάτω μήνυμα:

We are searching for a Master student to undertake an internship at the Laboratory of Planetology and Geosciences (LPG, Nantes) that is dedicated to the investigation of high-pressure gas clathrate hydrates by using in situ Raman spectroscopy and X-Ray diffraction.

The internship is a part of the ANR PRC project "CAGES" that is run in collaboration between LPG and European Synchrotron Radiation Facility (ESRF). Depending on the performance, after the internship and accomplishment of the Master studies, the student can undertake a PhD position at ESRF starting autumn 2024 and will be integrated in the Graduate Programme in Earth and Planetary Sciences at Nantes Université.
